

### the right data.

Our online professional development courses are embedded with State content standards and tied to the CT Teacher Technology Competencies. Districts can even further align these workshops to their own unique goals and standards via their EzTraxx application.

Throughout our workshops, educational philosophies are explored and supported by field experts such as Carol Ann Tomlinson, Howard Gardner, Robert Marzano, Judith Dodge, and Thomas Armstrong, to name a few. A bibliography and resource list are provided for every ProTraxx workshop.

Our online learning environment is driven by effective teaching strategies. Each workshop contains pre and post assessments, journaling, forums, interactive lesson plans, videos, sample activities, templates, and authentic learning activities that are scored according to a rubric by our certified instructors. Each district is also provided with a Summary Results Profile upon the conclusion of each workshop. This profile includes information such as the names of the participants and all of their corresponding scores, reflected in their cumulative coursework portfolio.

### benefits

- Anytime, anywhere online learning
- Authentic-based learning experiences culminating in activity development, submission, and rubric scoring
- No time away from the classroom
- No substitute coverage necessary
- Enhanced accountability for administrators and staff
- Cumulative coursework portfolio developed by each participant and shared with district administrators in a user-friendly monthly summary results profile report
- Access to PLCs
- Video/audio presentations
- Online journaling and forums
- Enrollment via MyEzTraxx catalog
- One-on-one instruction and interaction
- Growing offerings of online workshops based on district requests and current educational philosophy trends
- District hosting of PD workshops
- Downloadable files
- Take-it, Make-it activities and templates available for download
- You determine the CEU award amount

### online learning at its best.

the right source.  
the right data.  
the right service.  
the right price.

Over the past 10 years, ProTraxx has worked with more than 1,000 Connecticut schools and educational programs to streamline and simplify the record-keeping mandates for schools as PD providers. Now, ProTraxx has expanded our services to include high-quality, standards-based online professional development workshops created for K-12 educators.

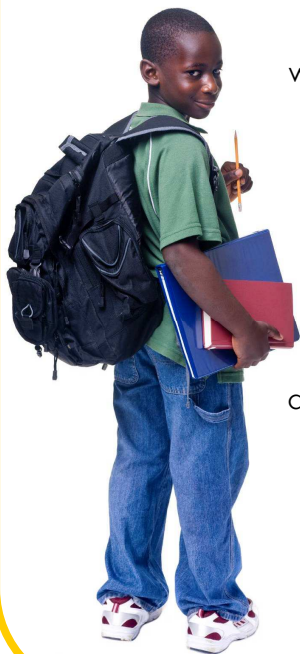

ProTraxx has prided itself on providing our districts with excellence. We have continued this tradition in developing our interactive, authentic, project-based professional development workshops trainings.

**You'll love learning with us!**

## the right service.

ProTraxx's online PD workshops are hosted in our custom-designed learning management system, which seamlessly connects each district's MyEzTraxx enrollment catalog to our online Moodle environment. Therefore, all workshops and trainings will be made available to all participating districts directly through your own MyEzTraxx home page. Our staff will create and include a listing of all workshops and trainings in each individual district's PD online catalog. Enrollment can be administrator or participant driven. Once the workshop or training has taken place, our certified instructors will access each district's ProTraxx application to take attendance online and distribute your evaluation forms. District CEU Coordinators will then login to their EzTraxx application, and issue CEUs. Your district

remains the service provider for these workshops, allowing you to host all workshops in your EzTraxx application, and include their related data in any detailed reports you may choose to run through EzTraxx. Enhancing your data-driven decision making abilities is just one more unique benefit our online PD workshops offer!

## the right source.

Our online PD workshops have been created by CT certified educators with decades of teaching, administrative, and training experience. Our staff has also earned additional degrees in specialized areas, such as Administration and Educational Technology.

This expertise has allowed us to successfully integrate educational theory and practice into each of our workshops, culminating in the enhancement of the teaching and learning process.

This year, in response to district feedback, we will be offering PD workshops that meet the diverse needs of our schools. Our library of classes will continue to grow, and workshop customization is a service we offer to our districts.

### online pd available as of November 2009

- Effective Teaching Strategies (Part 1)
- Differentiated Instruction (Part 1)
- Parent-Teacher Communication & Student Motivation
- Addressing Multiple Intelligences
- PowerPoint in the Classroom

### additional online pd available as of February 2010

- Effective Teaching Strategies (Part 2)
- Differentiated Instruction (Part 2)
- Data-Driven Decision Making
- Paraprofessional Training
- Literacy across Disciplines

## the right price.

For ProTraxx, providing quality online PD workshops at a reasonable price is a top priority. Enjoy our introductory offer of **\$50 per participant per online workshop** through Dec. 1<sup>st</sup>, and experience the benefits of our anytime, anywhere online workshops. Let us help you keep your educators where they are needed most – in the classroom.

### Online PD Workshops:

- \$50 per participant, per workshop
- Each purchased registration may be applied towards any of the offered PD workshops, each offered on a monthly basis.
  - 25 registrations - \$1250
  - 50 registrations - \$2500
  - 100 registrations - \$5000

(Purchase price \$59 per participant after Dec 1<sup>st</sup>; 100+ registrations receive an additional 5% discount.)

### online workshop hours

Every workshop begins on the first of each month, and concludes three weeks later. Workshops will require at least 3-4 hours of participant time. Because each district is the service provider of these workshops, the time commitment and CEU award amount is determined by you.
